SUMMARY

Frontend Developer with hands-on experience building logistics and shipment management platforms using React.js and REST API integration. Skilled in the MERN stack, including Node.js, Express.js, and MongoDB, with strong problem-solving, quick learning, and collaboration skills.

EDUCATION

Bachelor of Technology (B.Tech), Jawaharlal Nehru Engineering College 12/2020 - 07/2024

• **Courses:** COMPUTER SCIENCE ENGINEERING - CGPA 7.33/10

EXPERIENCE

Frontend Developer 01/2025 - Present

V Power Logistics, Gurgaon

- Built an internal admin dashboard handling 1,000+ operational records, improving data visibility and management efficiency.
- Implemented secure authentication and role-based access control for protected application modules.
- Managed global application state using Redux for efficient and predictable cross-component data flow.
- Integrated REST APIs using Axios for seamless frontend and backend communication.
- Developed reusable UI components including tables, forms, modals, and cards to improve development efficiency.
- Optimized application performance using lazy loading and debounced search techniques.
- Converted Figma designs into responsive, pixel-perfect UI components using React.js and modern CSS practices.

MERN Stack Developer Intern 06/2024 - 12/2024

Scalefull Technologies, Pune

- Assisted in developing full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), contributing to a 20% increase in team productivity by automating internal workflows.
- Collaborated with a team of 4+ developers to design and implement responsive, user-centric interfaces using React.js.
- Designed and optimized MongoDB database schemas and developed RESTful APIs, reducing data retrieval time by 30%.
- Utilized Git for version control and collaborative project management in an agile development environment.

PROJECTS

User Management System (Company Project) [Live link](#)

Developed a role-based CRM and admin management platform for multiple logistics departments using React.js. Implemented authentication, protected routes, dynamic dashboards, reusable table components, filtering, and pagination features. Integrated RESTful APIs for managing operational data and improving workflow efficiency.

Trucker/Shipper Platform (Company Project) [Live link](#)

Built a logistics marketplace platform connecting truckers and shippers with real-time operational workflows. Developed responsive UI components, shipment management features, search/filter functionality, and API integrations. Implemented centralized state management and optimized data rendering for better application performance.

Ocean Shipment Platform (Company Project) [Live link](#)

Developed a scalable ocean freight management platform for shipment booking, rate management, and operational workflow handling. Implemented REST API integrations, dynamic state management, reusable UI components, and responsive frontend architecture to streamline logistics operations and enhance system performance.

Full-Stack E-Commerce Web Application (MERN Stack) [Live link](#)

Built a scalable e-commerce platform using MongoDB, Express.js, React.js, and Node.js. Implemented JWT-based authentication along with product and category CRUD operations, cart functionality, order management and role-based access control. Integrated the PayPal payment gateway to enable secure online transactions through RESTful APIs.

SKILLS

Front-End Development: HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, React, Redux

Back-End Development: Node.js, Express.js

Databases: MongoDB, SQL

Version Control: Git, GitHub, Postman, VS Code

Concepts: Object-Oriented Programming (OOP), RESTful APIs
